SAVINGS ON EVERY PAGE!

Read What Charlie Underhill Has to Say About This Summer Cleanup Sale

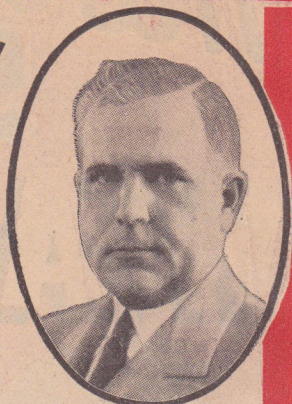

JIM BROWN has certainly "gone to town" in this Mid Summer Cleanup Sale Bargain Book. It is a lesson to all of us younger fellows. It shows that we should never be satisfied, but that we must keep on trying to reduce our prices in every catalog we issue no matter how low our prices already are. Whenever we send out a catalog I swell with pride because I am associated with a fellow like Jim Brown. All his thoughts are centered in saving more and still more money for his customers. The proof will be found in this catalog which you now hold in your hands. Look at any page—look at every page and you will realize what Jim Brown has done and is doing for you.

I need not tell old friends about the quality of Jim Brown products. They know that it can't be beat at anything like the prices quoted. They know that our absolute guarantee of satisfaction or money back protects them in case of even the slightest disappointment.

Let this Mid Summer Sale Book be your guide to lower prices. Buy now instead of waiting. Summer time is Money Saving time.

Remember we pay the Freight on Orders of \$5.00 or more not including Postpaid items, and we pay postage on everything in this catalog marked Postpaid.

1

CHARLIE UNDERHILL, President of The Brown Fence & Wire Company, has been connected with The Brown Fence & Wire Co. for nearly 20 years. A faithful follower of Jim Brown's principles, he is here to see that you get a bargain every time you send us an order. Write to Charlie—he will be glad to hear from you at any time.

Jim Brown E-CONO-ME House Paint

The Best House Paint Made at This Low Price.

Even if you are forced to economize don't put off painting your house. My E-CONO-ME House Paint will beautify and protect your home for several years and costs very little. It is by far the best paint I have seen at its price. Contains the correct amount of pigment balanced with durable oils. Spreads easily, covers well, and goes a long way. Will not crack, peel, or check. Can be used indoors or outdoors with equal satisfaction.

As Low As

97^c
Per Gal.

Don't judge this paint by the price alone. I am sure you would have to pay considerably more for a paint of equal quality, if purchased elsewhere. I am also sure that even if you could get paint at the price of my E-CONO-ME, you would not begin to get as good quality.

Beauty and Protection at Small Cost

Thousands of gallons of E-CONO-ME House Paint have been used and home owners praise it as being the best low priced paint on the market. Next to my Wearbest and 100% House Paint shown on the following pages, I recommend my E-CONO-ME House Paint. It will give you real service, protection and satisfaction. The white is real white, and the colors are bright and true. Furnished in White or same colors as my Wearbest and 100% House Paints shown on pages 4 and 5.

Economy House Paint

Cat. No. 5U41

Orders of 5 gallons or more supplied in 5 Gallon Cans as far as possible.

25 gallons or more	97c Per Gal.

If you want the highest grades of House Paint, buy my Wearbest or 100% brand. If you want the best low-priced paint, order E-CONO-ME.

More Than 50,000 Homes have been Painted With My **WEARBEST HOUSE PAINT**

My Guarantee

I guarantee that you will be thoroughly satisfied with the Jim Brown Wearbest House Paint you purchase, providing you follow directions when applying it.

After completing your painting, if you are not delighted with results, I will refund your money or replace the paint free. If you do not receive the number of year's service you have a right to expect from Wearbest House Paint, I will make an adjustment that will make up for the difference.

JIM BROWN.

How to Figure Amount of Paint Required

Under average conditions, Jim Brown Paints will cover the number of square feet per gallon mentioned in each description. However, it may require from 10 to 15% more, if the surface is old and has never been painted before or if it has been painted before and the surface is in poor condition.

The number of gallons required can be determined by multiplying the distance AROUND the building by the HEIGHT. Then divide by the number of square feet ONE gallon will cover. Example: a building 30' wide x 45' long x 20' high would figure as follows: $30 + 30 + 45 + 45 = 150 \times 20' \text{ high} = 3,000 \text{ sq. ft. of surface}$. Divide this by number of sq. ft. of surface a gallon will cover, and your answer is the number of gallons required.

Why? BECAUSE of its QUALITY and MY LOW PRICE

You can't buy a better paint than WEARBEST at anywhere near my price. I know that Jim Brown Wearbest House Paint will look better, last longer, spread easier, cover better and cost less than many other higher priced paints. I wish I could show you the many complimentary letters which I receive about Wearbest. Some tell me how much money they saved on their paint job. Others tell me about its excellent quality, its glossy finish, its hiding capacity, etc. I know that when you have had this paint on your buildings and see how well it weathers the elements you too will want to write and tell me how well pleased you are.

Greater Coverage For Less Money

WEARBEST House Paint is made of lead, zinc and other reinforcing pigments, ground in pure raw linseed oil, mixed with other high-grade oil and the necessary amount of drier and thinner. A combination that has stood the test of time.

It spreads easily and one gallon covers about 300 sq. ft. of surface with two coats as thoroughly as many paints which sell for 25% to 35% more per gallon. It will give you years of service.

Wearbest House Paint Prices

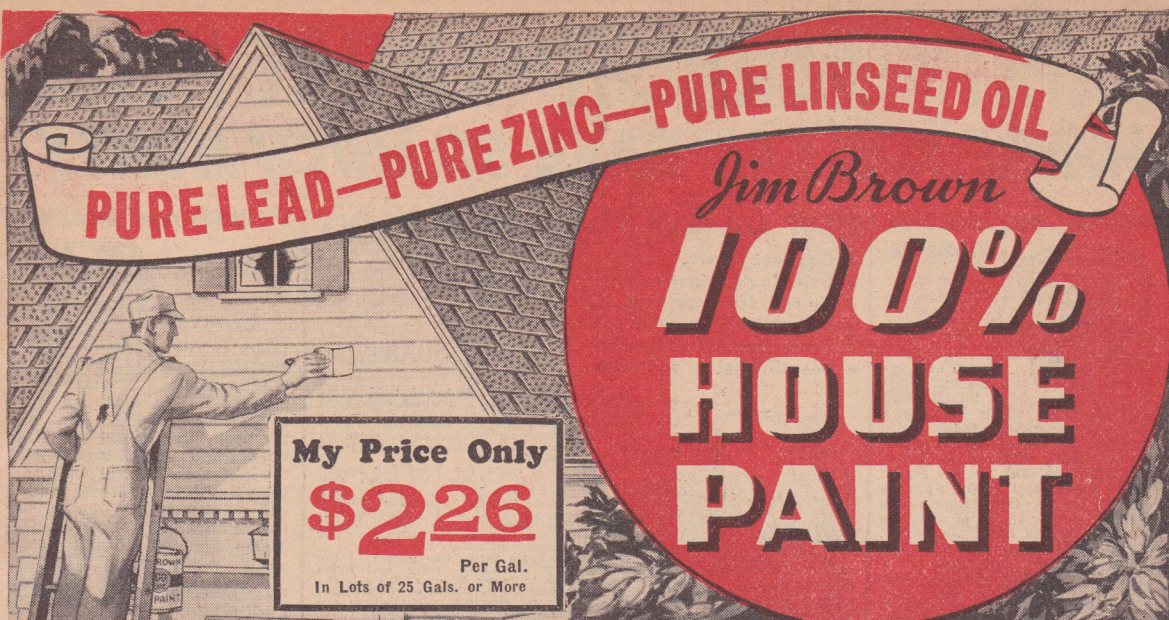

Ivory, Cream, Colonial Yellow, Buff, Light Brown, Dark Brown, Ceiling Blue, Red, White, Pearl Gray, Medium Gray, Slate, Sea Green, Light Green, Blind Green, Bronze Green, Maroon and Black. Orders of 5 gallons or more supplied in 5 gal. cans as far as possible.

PURE LEAD—PURE ZINC—PURE LINSEED OIL

Jim Brown
**100%
HOUSE
PAINT**

My Price Only
\$2.26
 Per Gal.
 In Lots of 25 Gals. or More

IMPROVED FORMULA *Now Makes My 100% Paint Better Than Ever*

WHY PAY MORE FOR 100% PURE PAINT?
Compare My Price, My Formula, My Guarantee!

There are a great many house paints and as many formulas on the market, but I know you cannot get higher quality or purer paint than Jim Brown 100% Pure Lead and Zinc Outside White Paint. Nothing but Pure White Lead and Zinc Oxide and Pure Linseed Oil and a necessary amount of thinner and drier goes into my 100% Outside White House Paint. There is absolutely no filler, NO CHALK, NO CLAY or other inert materials in this paint. It is PURE, and only high grade color pigment is used to make 100% house paint in the various beautiful colors.

My 100% paint is so thick and heavy, you will have to thin it out with plenty of linseed oil. It will cover better than three or four coats of some cheap paints. Its hiding power is unsurpassed. One gallon will cover at least 400 sq. ft., 2 coats. How to Figure Paint Requirements Shown on Page 4.

READ THE FORMULA! Ask any painter or your State Chemist if a better paint can be made. Compare it with the highest priced house paints made by anyone, anywhere.

COMPARE MY GUARANTEE

I guarantee that you will be completely satisfied with my 100% house paint, provided you follow directions in applying it. After completing your painting, if you are not delighted with the results, I will refund your money or replace the paint free. If you do not receive the number of years' service you have a right to expect from this paint, I will make an adjustment that will make up for the difference.

UNDER-SEAL PRIMER for 2-COAT WORK

One coat of UNDER-SEAL Primer Paint with one top coat of any of my regular house paints will give as good covering and protection as three coats of ordinary paint.

In this primer the proper quantity of pigment is combined with a sufficiently non-penetrating liquid so that the amount of absorption is controlled. The result is a uniform film equivalent in thickness to two ordinary coats applied by the old method.

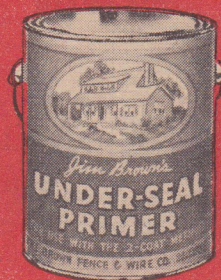

UNDER-SEAL Primer covers about 500 sq. ft. per gallon. For top coat figure that one gallon will cover 400 to 700 sq. ft. of surface, depending on the grade of paint ordered for the top coat.

Furnished in WHITE, LIGHT GRAY or LIGHT CREAM. White color undercoat is recommended when white top coat is to be used. Light Gray undercoat with all gray top coats. Light Cream for all other colors of top coats. Be Sure to State Color Wanted.

PAINT and VARNISH the ENTIRE HOUSE WHILE YOU CAN SAVE SO MUCH MONEY!

SEMI-GLOSS ENAMEL

Washable

69c
QUART

An extremely durable and fine appearing finish for interior walls and woodwork which produces a semi-gloss, enamel-like finish. Noted especially for its easy spreading and surface hiding qualities. It is easy to keep clean and for this reason makes a wonderful finish for kitchen and bathroom. One gallon covers from 250 to 300 sq. ft. of surface—2 coats. Colors are White, Ivory, Cream, Buff, Tan, Light Blue, Vermillion Red, Pea Green, Nile Green, Light Gray, Deep Blue, Orange, Orchid and Black.

NEW CASEIN FLAT WALL PAINT

- One coat covers.
- Dries in 40 minutes.
- No oil! No turpentine.
- One gallon covers 600 to 800 sq. ft.
- Paints over old wallpaper.
- Beautiful colors and white.

A new and economical flat wall paint which is easy to apply and which dries hard in about 40 minutes and brushes out easily. It leaves no unpleasant odors, and is suitable for decorating rooms, halls, ceilings, dens, basements, etc. Also used inside poultry houses, stables, etc.

Casein paint costs the least per square foot of surface of any flat wall paint. One coat has good hiding ability. You can even use it on old wallpaper. It produces a beautiful soft, velvety finish on any wall surface. Can be used successfully on wood, metal, wallpaper, insulating board, canvas, plaster and other interior surfaces.

Comes in Paste form, one gallon of the paste plus 2 quarts of water will make enough paint to cover 600 to 800 sq. ft., depending upon the condition of the surface. Furnished in 9 beautiful colors which are cleanable with mild soap and water.

Stop ROOF LEAKS WITH Jim Brown's ROOF SAVER

ONLY

33^c Per Gal.

in 50 gal. barrels

Don't wait until your roofs begin to leak. Give them a coating of Jim Brown Roof Saver Now. It flows into all the cracks, plugs up and seals all the seams and nail holes. It forms a solid covering of waterproofing over the entire roof surface which preserves the durability of your roofing indefinitely for only a few cents a square. Jim Brown Roof Saver stops your roofing worries. Can be applied on composition, felt or gravel roofs. Requires 1 to 1½ gallons per 100 sq. ft. for smooth surfaced roofs and 3 to 3½ gallons per 100 sq. ft. for gravel roofs or slate surfaced roofing. Also used for gutters, downspouts, skylights, tanks, silos and building foundations. Not recommended for use on wood shingles. For large holes and cracks and for use around flashings, use my Plastic Cement shown below.

Prices shown below are for BLACK Roof Saver. If RED or GREEN Roof Saver is desired, add 45c per gal. to these prices. STATE COLOR WANTED

New Life ROOF PAINT

A Protective Coating For Old or New Roofs

New-Life spreads with a thick rubber-like coat which dries hard on the surface but remains flexible underneath, expanding and contracting without cracking. It will not "run" in the hottest weather and contains no lead, tar, acid or other ingredients which might taint or discolor rain water. Can be used on old, worn-out composition roofing or to preserve the life of new roofing. A perfect coating for any metal. Adheres to wood, concrete or stone and is frequently used on foundations.

Do not confuse New-Life Roof Paint with thin black paints you sometimes see. New-Life is a heavy paint and requires one coat only. Covers about 175 sq. ft. per gallon on ordinary surfaces. I pay the freight on orders of \$5.00 or more. See prices per gallon below.

WEARBEST

I have sold my WEARBEST Barn Paint to farmers in every section of the country. Many of these customers probably did not realize how good the paint was but bought it because it was low priced. Well, they know now that my WEARBEST Barn Paint really lasts, really protects, and really looks fine in spite of its low price. That's because it has quality oil and quality pigment in it, and is mixed by men who know how! My 50-year reputation for fair and square dealing assures your complete satisfaction or I will make it right.

A Real Paint Priced Low

The first brushful of WEARBEST Barn Paint will convince you that it is real paint. One gallon covers about 300 sq. ft. 2 coat work and covers it well. Beautify and protect your buildings at low cost with Wearbest.

WHITE CREOSOTE

Creosote has long been recognized as one of the best protections for wood, but heretofore it could only be obtained in its original dark, grimy state. Now Jim Brown offers you SPOTLESS WHITE CREOSOTE PAINT. And considering its excellent quality, its price is exceptionally low.

For Inside or Outside Uses

Especially recommended for barns, basements, fences, garages, hog pens, hen houses, kennels, out-buildings, stucco, trellises and wherever a creosote preservative paint is needed. A disinfecting paint. Repels vermin. On rough surfaces one gallon will cover 150 to 200 sq. ft. 1 coat work; for dressed lumber figure about 225 to 300 sq. ft. 1 coat work. One coat is generally sufficient unless the surface is very absorbent. If two coats are wanted figure 50% more paint.

Also Supplied in Colors

Can be supplied in WHITE, BIG 4 YELLOW, LIGHT GRAY, DARK GRAY, RED, MAROON and BRONZE GREEN. BE SURE TO STATE COLOR WANTED. OTHERWISE WE SHALL SHIP WHITE. Orders of 5 gallons or more supplied in 5 gallon cans as far as possible.

PAINT IS CHEAPER THAN NEW BUILDINGS! PAINT NOW!

Jim Brown PERFECTION Asphalt Roofing

Just See How Little It Costs to Put a Brand New Roof on Your Buildings

Perfection Roofing is made to meet the demand for a good quality roll roofing at a low price. To equal the quality of Perfection I believe you would have to pay 25% more than my price anywhere else! The reason my prices are so low is that I buy carload after carload of Perfection each year from the most reliable and largest roofing manufacturers and I am willing to take a small profit on my tremendous volume of sales.

I don't claim that Perfection Roofing gives the service that my Dreadnaught or Armor Coat roofing does, but I will say that it is ideal for use where first cost is an important consideration. Perfection Roofing will give satisfactory service for more years than you expect at such a low price.

Why Pay More Than My Prices?

Don't judge Perfection Roofing by price alone. It has a base of high grade rag felt, thoroughly saturated and coated with hot asphalt; talc finished on both sides. Contains no tar or rubber. Compare construction with others and you will see why it pays to buy your roofing from Jim Brown. Each roll contains 108 sq. ft. and covers 100 sq. ft.; we allow 2 inches on each roll for the lap. Comes with enough nails and cement for proper laying.

I particularly recommend Perfection for tool sheds, out-buildings, siding, and wherever a low priced roofing is desired, and I suggest that you use heavy weight for permanent roofs.

IMPORTANT 7/8 in. Nails and Cement Free. Each roll covers 100 sq. ft. To lay roofing over shingles order 1 1/4 inch nails and add 10 cents per roll extra.

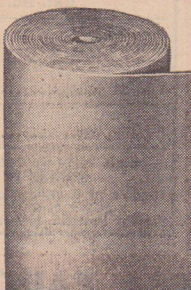

Cat. No. 3U1 Perfection Roofing

Jim Brown DREADNAUGHT Asphalt Roofing Mica - Galvo - Finish

**Worthy of
the Finest Buildings
A Quality Roofing at a Bargain Price**

My Dreadnaught Roofing is all that the name implies. It is built to weather hard storms and to withstand for many years the battles waged against it by driving rain, hail, and wind, melting snow and burning sun. That's why thousands of people in all sections of the country use Jim Brown Dreadnaught Roofing. In addition to giving wonderful service Dreadnaught has a Mica-Galvo finish which makes it attractive.

Jim Brown Dreadnaught Roofing is made of the same high quality, long fibre, rag felt that is used in my famous Armor Coat Roll Roofing and Shingles. Every fibre is saturated with an asphalt saturant. Both sides are then surfaced with a heavy coating of hot waterproof asphalt which seals the asphalt saturant. This allows the roofing to remain flexible, and prevents rapid drying, cracking, blistering, and hardening.

Attractive—Permanent—Easy to Lay

If you want the best roofing value for your money use Dreadnaught. Your roofing problems will be over for years to come. No time lost—no crops or property spoiled. Suitable for new roofs as well as over old shingle or composition roofs. Each roll contains 108 sq. ft. and covers 100 sq. ft., allowing for 2 inch lap. Enough Galvanized Nails and Cement for proper laying are included in each roll. Furnished in three weights, any one of which is suitable for permanent roofs. The Heavy Weight and Extra Heavy Weight are approved by the National Board of Fire Underwriters and save you as much as 12% on insurance when used in place of wood shingles.

I am proud to offer Dreadnaught Roofing. It is the best grade of smooth-surface asphalt roofing made—is sold by me at a low price—and is a real investment in your buildings. Below are my Low Prices. Remember Jim Brown Pays the Freight on Orders of \$5.00 or More.

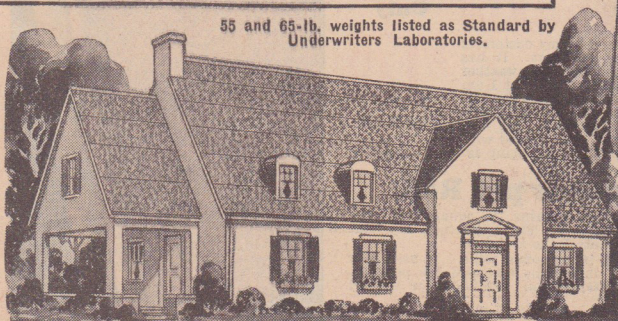

IMPORTANT ¾ in. Nails and Cement Free. Each roll covers 100 sq. ft. To lay roofing over shingles order 1¼ inch nails and add 10 cents per roll extra.

of Armor Coat Roofing. It has always given the best satisfaction.

The backbone of this roofing is a high quality, long fibre rag felt base which is saturated with asphalt saturant, sealed and coated on both sides with hot asphalt. A thick layer of bright, non-fading Crushed Slate that will not wash off or discolor rain water is embedded in the roofing. Resists burning embers, flames and sparks, and is listed as Standard by the Underwriters' Laboratories, Inc., saving you about 12% on insurance in most localities, as against wood shingles.

Two-Inch Water-Tight Lap Joint on Each Roll

You have a choice of 3 New Brilliant, Non-Fading Colors: Red, Green, and Gray-Black. Not to be confused with the old dull shades found on ordinary roofing. More beautiful and just as permanent at no increase in price.

Each Roll of Armor Coat is 36 in. wide, 36 ft. long and contains 108 Sq. Ft. covering 100 Sq. Ft., allowing for two-inch water-tight lap. Easy to apply—no experienced labor required. Can be used on a new roof or over old shingles or composition roofs.

EVERITE Slate Surfaced ROOFING

SPECIAL BARGAIN

Only

\$1.76
Per Roll

This roofing has been purchased by my customers all over the country for about 20 years. It has been tested in every climate, under all weather conditions. It has proved so satisfactory that I am absolutely confident it will meet all your requirements for a durable, leak-proof, fire-resisting roofing. It is made with a base of long fiber rag felt, thoroughly treated and saturated, then coated with heavy asphalt—NOT TAR. The slate surfacing is then embedded in the asphalt under pressure.

Weighs 75 Pounds per Roll!

Each roll weighs 75 pounds and contains 108 square feet, covering 100 sq. ft. allowing 2 inch laps. The water-tight lap-joint makes cementing easy and prevents leaks at joints.

Supplied with cement and 1 1/4-inch roofing nails. If used over shingles be sure to specify 1 1/4-inch nails and add 10c per roll. Furnished in Red, Green or Gray-Black. Specify color wanted or we will ship GREEN.

POINT-EDGE ROLL ROOFING

Recommended for use only over old roofing and not over sheathing. Point-Edge roofing has a long fibre rag felt base, impregnated with hot asphalt and surfaced with bright colored, non-fading, crushed slate. It comes two strips in a roll, covering 100 sq. ft., allowing for 2 inch lap, as shown in illustration, giving the appearance of a shingled roof.

Comes in Red, Green, Gray-Black or Color-Blend (a mixture of Red, Green, Gray-Black and Tan). Nails are not included. Use 1 1/2 lbs. of 13/4-inch nails per roll; priced separately on page 12.

State Color Wanted. If No Color is Specified We Ship Green. Weight, 100 lbs. per Roll.

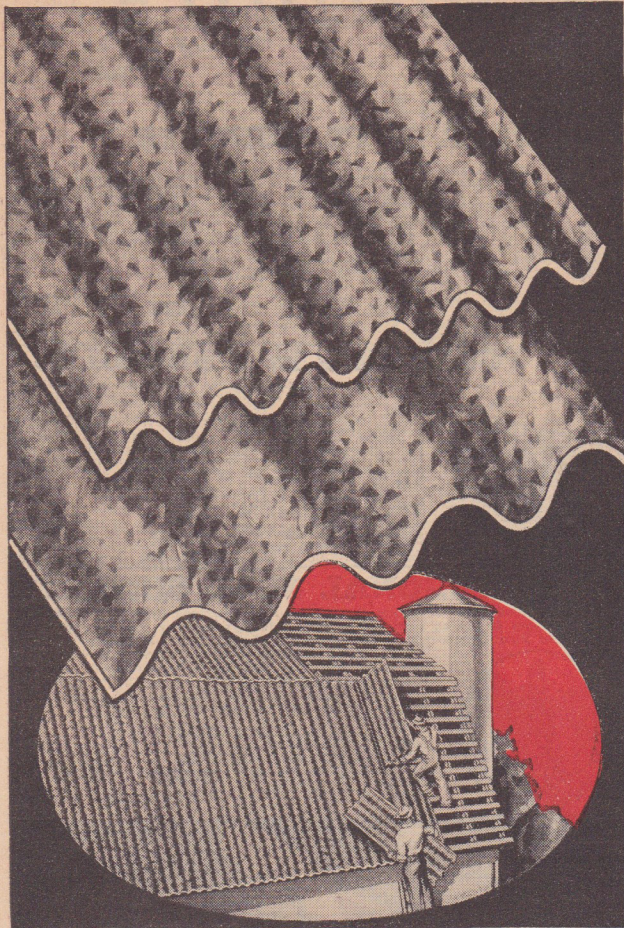

No. **3U9—Point-Edge Roofing.** Per Roll... **\$2 42**

Freight Prepaid on Orders of \$5.00 or More

Jim Brown

METAL ROOFING

Corrugated

Direct from Factory to You

I have always saved money for my customers on Metal Roofing but now I can save you more money than ever because I have my own Metal Roofing Factory! Compare my prices with others and satisfy yourself that Jim Brown offers you more for every dollar than anyone else. Let me emphasize the fact that Jim Brown Metal Roofing is made of Quality Sheets. Every sheet of my Metal Roofing conforms to the building codes in all cities and States as well as to the U.S. Bureau of Standards Specifications. My galvanized sheets are GALVANIZED ON BOTH SIDES AFTER THEY ARE CUT so there are no unprotected edges. It is a QUALITY Metal Roofing and is low-priced because it is sold Direct From My Factory to You.

Advantages of Metal Roofing

Metal roofing is suitable for practically any kind of building, such as: Houses, barns, garages, corn cribs, sheds, hog pens, chicken houses and other outbuildings. On account of its long life metal roofing has a low maintenance cost.

In addition to weather protection, metal roofing offers fire protection, and lightning protection. When properly grounded, metal roofing will prove to be as good a lightning arrester as lightning rods. For grounding, I recommend attaching a No. 3 galvanized iron wire to each corner of the metal roof. Then attach the other end of the wire to a galvanized iron pipe which has been driven at least 8 feet into the ground so that it will reach moisture.

Metal roofing also has an architectural beauty of its own. Did you ever see a group of buildings which had a certain attractiveness, a group which seemed to appeal to your sense of substantiality? Chances are they were all roofed with lasting metal roofing.

Many persons catch and use rain water which runs off their roofs. Water from a metal roof is usually clean. A metal roof presents a smooth, hard, non-absorbent surface. It does not harbor dirt and filth because its surface is swept by the breezes and purified by the sun.

Probably one of the greatest advantages of metal roofing is its inexpensive and easy application. It can be laid on a skeleton framework, if desired, saving both labor and lumber.

How To Figure Sheets Required

To find the number of sheets required to go across the roof divide the length of roof by 2, as each sheet covers a space 2 ft. wide. Then decide the length of sheets required to reach from ridge to eaves and add enough for end laps. For cyclone or gambrel roof measure from ridge to hip and from hip to eaves; figure each one separately for correct length of sheets. See opposite page for typical example of how to figure number of sheets required.

Lead Head Nails

Furnished in 4 sizes: 1½" and 1¾" recommended for new roofs, 2" and 2½" for applying over old roofs. STATE LENGTH WANTED, otherwise we will ship 1¾". Figure 2 to 2½ lbs. of nails for each 100 sq. ft. of roofing.

Cat. No. 3U321... 12½c Per Lb.

Lead Washers

When used with galvanized nails, lead washers make a water-tight job. A pound contains about 225 washers or enough for 200 sq. ft. of metal roofing.

Cat. No. 3U331... 21c Per Lb.

Galvanized Nails

Rust-proof and long lived. Use 1¾" for metal roofs laid on sheeting and 2½" if laid over shingles. For each 100 sq. ft. of metal roofing you will require 1 lb. of 1¾ in. or 1½ lbs. of 2½ in. nails. Lead washers should be used with these nails. Also used for applying Armor Coat Shingles and Point Edge Asphalt roofing.

STATE SIZE WANTED.
Cat. No. 3U311—¾ in. Long

No. 3U201—2¼". Per Length..... 66c

AT FACTORY PRICES

and V-Crimp

Full Size—Full Gauge—Full Weight

Be sure the metal roofing you buy is Full Size, Full Gauge and Full Weight. Every sheet of Jim Brown Metal Roofing is full length and full width. Every sheet will cover 24" wide and take care of regular side laps. The sheets are uniformly full gauge. Both sides and all edges of every sheet have a heavy, even coating of galvanizing.

Be sure the sheets are NOT CUT after they are GALVANIZED. There is a lot of "bargain" metal roofing being offered, but THERE IS USUALLY SOMETHING WRONG with it so BEWARE of it.

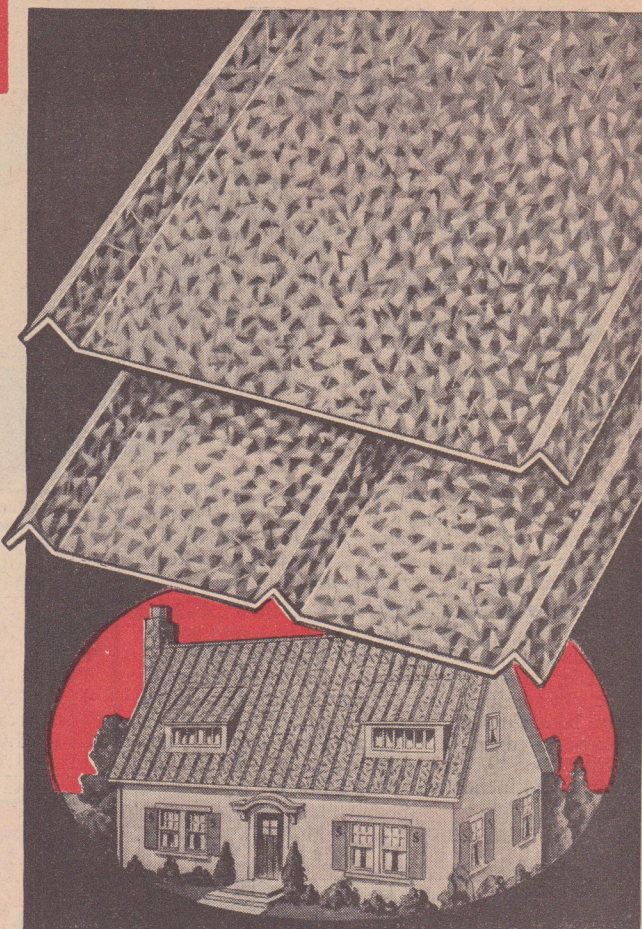

On the other hand, DON'T PAY AN EXORBITANT PRICE for a real HIGH QUALITY Metal Roofing! You can buy from Jim Brown SAFELY because I DO NOT SELL ANYTHING BUT QUALITY SHEETS, full size, full weight, full gauge, galvanized with a heavy coat of pure zinc on both sides and all edges. My prices are absolutely ROCK BOTTOM because I sell my Metal Roofing DIRECT TO YOU from my own FACTORY.

An Everlasting Roof

The galvanizing is done by the HOT DIP process. All sides and edges of each sheet get a heavy, uniform coating of pure zinc. This kind of roofing gives 100 cents worth of service for every dollar invested.

Jim Brown 2-V Crimp roofing has a crimp at each side of the sheet and the 3-V has a crimp at each side as well as one in the center, giving it extra stiffness. Wood "V" sticks should be used under the outside crimps for nailing. Use lead headed nails or galvanized nails with lead washers. See bottom of page 14.

Jim Brown Galvanized Metal Roofing is made in three weights—29 gauge is the lightest, 28 gauge is the medium weight and 26 gauge is the heavy weight. I recommend 26 gauge for LONGEST WEAR. My galvanized roofing is practically indestructible. It gives you protection you want against weather, fire, and, when grounded, lightning. Painted Roofing is coated with a "shop coat" of red oxide metallic paint but should be painted again on both sides before being applied. Painted Roofing is made only in the 28 gauge.

What Size Is Your Roof?

Here's how to figure the number of sheets you require. For a plain gable roof 18 ft. from ridge to eaves by 30 ft. long, divide the length (30 ft.) by 2 (2 ft. covered by each sheet). Therefore you need 15 sheets to go across the roof.

Measure distance from ridge to eaves and add one foot for end laps; figure what lengths will answer your purpose. Adding one ft. to 18 would give you 19 and the best lengths to use would be 1—9 ft. and 1—10 ft. length. As it requires 15 sheets to go across the roof once, you would need 15—9 ft. sheets and 15—10 ft. sheets for each side or 30—9 ft. sheets and 30—10 ft. sheets for both sides.

Jim Brown's **NEW** **DOUBLE** **CHANNEL**

POSITIVE DRAIN
GALVANIZED METAL
ROOFING

See Why This Roofing **Can't Leak** **Can't Syphon!**

I am mighty proud to offer this amazing new design in galvanized metal roofing. One glance at the sectional view shown in the circle will convince you that there's no way water can syphon through. At the side of each sheet there's a crimp with a double channel which provides **TWO DRAINS** for water to run down. That's why this roof keeps any building as "dry as a bone."

Every Sheet Heavily Galvanized

This roofing is made of Quality, heavily galvanized sheet steel. Every sheet is accurately made, carefully inspected and must be according to my specifications. Every sheet is galvanized on both sides and on the edges. There are no exposed edges. Because of the stiffness of this roofing no "V" sticks are necessary. Each sheet covers 24 inches wide; we allow for lap.

Look at This Design

It is practically impossible for water to flow up hill and fill up the first channel, but if this should happen it would have to climb up over the ridge and even then would flow down to the gutter in the second channel.

Here's a Metal Roofing For a Lifetime's Service

Jim Brown DRY AS TOAST **M-DRAIN ROOFING**

Here is my "M" DRAIN watertight metal roofing. As you

will see from the illustrations, each sheet of this roofing has 5 Crimps, one in the center and **TWO AT EACH SIDE**. When

lapped, the double crimps at each side form a **DOUBLE "M"**. It is practically impossible for water to get up and over the two humps. My "M"

Drain roofing requires no wooden "V" sticks. The crimps are designed to fit perfectly and give strength and rigidity at the laps where it is most needed.

My "M" Drain watertight roofing is made from the same quality sheets as my other styles of roofing, full size, full weight, and full gauge, galvanized with pure zinc spelter on both sides and on the edges. You have a choice of 26, 28 and 29 gauge material. Every

sheet covers a space 24 inches in width. If you want a roof that will give you service and satisfaction—that will keep your house or barn as dry as toast in any weather—a roof that is fireproof and lightning-proof when properly grounded, I recommend my M-Drain Roofing.

M-Drain Roofing resists wear and weather for so many years that it will cost you less per year than any other roofing you can buy. You can't go wrong with it.

Jim Brown Pays the Freight on Orders of \$5.00 or More

Save MONEY

MADE IN AMERICA

My Barb Wire is Made by American Workmen WHO EAT THE FOOD RAISED BY AMERICAN FARMERS. It is made by Americans who WEAR THE COTTON AND WOOL grown by American Farmers and who LIVE IN HOMES BUILT WITH LUMBER CUT FROM AMERICAN FARMS.

Every spool of Jim Brown Barb Wire is made in America and is not to be compared with the cheap, foreign-made barb wire which is poor in quality to begin with and which gets worse as it comes in contact with the salt air while crossing the ocean. Some of this foreign-made barb wire has actually started to rust before it is unloaded from the boats. Jim Brown American-made Barb Wire comes to you bright and new—not damaged by salt air and water.

Jim Brown Barb Wire is made of open-hearth steel heavily galvanized with Hi-Test Pure Zinc. The double cable wires are twisted together evenly, dividing the strain equally on each wire. The barbs are well formed, sharp pointed and spaced evenly. The wire is FULL WEIGHT and FULL GAUGE and stretches tight as a violin string. The heavily coated, Hi-Test Pure Zinc Galvanizing prevents it from rusting for years after many other barb wires have been replaced. Some of my Barb Wire has been up for more than a quarter of a century.

Jim Brown **ELECTRIC FENCER**

The Jim Brown FENCE-MASTER is operated by a 6-volt "hot shot" dry battery and will electrify up to five miles of wire. It is reliable because you have a steady source of current throughout the life of the battery—no "shut-offs" during electrical storms, etc. It is safe because it is impossible to get heavy surges of current, as might happen on a high line. It is convenient because you can take the Fencer to any field you want to without bothering to run a wire from your barn or house. Simply string your wire, drive a ground rod, connect the Fencer and the fence is ready. The Jim Brown FENCE-MASTER is precision built and uses very little current. Everything used in its construction is of the highest quality and it is guaranteed against defects for a period of a year. A "hot shot" battery should run it for 3 to 5 months under normal conditions. Control unit and battery are housed in a durable, weather proof box finished in crackle brown. The Jim Brown FENCE-MASTER has been tested and proved for three years. It has been tried indoors and outdoors, in sunshine, rain, hail, snow and sleet. Every set is tested before it is shipped. The FENCE-MASTER comes complete, ready to operate. The outfit includes Controller, Battery, 30 Line Insulators, 4 Corner Insulators, Fence Lead and Ground Lead. Line Insulators are supplied with bolts for use with steel posts. If wood posts are used fasten them with 16d nails and put a small piece of leather on the nail before driving to protect insulator from breaking. Approved by Wisconsin Industrial Commission.

Standard 4-Point Barb Wire

Made of two No. 12½ Galvanized Basic Open-Hearth wires, twisted together with barbs 4 in. apart for hogs and 6 in. apart for cattle. Sold in 80-rod spools only.

Catalog No.	Barbs	Standard 4-Point	Price
1U1246	6 in. apart	80 rod spool, Cattle..	\$3.15
1U1244	4 in. apart	80 rod spool, Hog....	3.37

BALE TIES

Single Oval-Loop

Made from specially annealed steel wire with a special hard-oil finish that resists rust.

There are 250 ties packed in a bundle. The loop-end of each bundle is protected by burlap, and the whole length of the bundle is spirally wrapped to prevent the ties from becoming bent and tangled. The wire used for this spiral wrapping comes off in one long piece. This eliminates the danger of short pieces of wire dropping into the hay. Sold only in full size bundles of 250 ties, of same gauge and length.

Cat.No.	Length	Gauge	Bundle
7U2111	8½ ft.	16½	\$.87

COPPER STEEL WIRE

Made from Basic Open Hearth Copper Steel. Wire is protected with a coating of Hi-Test Pure Zinc Galvanizing. The heaviest gauges (9, 10 and 11) are recommended for bracing terminal posts and for building grape arbors. Other gauges are excellent for repairing fences and for general use.

NOTE: Orders for over 100 lbs. of one gauge are shipped in catch-weight coils.

Here Are My HEAVY-WEIGHT POULTRY FENCES

Four Heights 36 To 60 In. High WITH STAY WIRES

Spaced 8 In. or 6 In. Apart

The fences listed below are all heavy weight poultry fences in an exceptional range of heights from 36 to 60 inches. They are the STIFF STAY style with the famous non-slip Brown Ring Knot. Copper-Steel Wire is used throughout, and extra life is also assured by a good protective coat of Hi-Test Pure Zinc Galvanizing.

BARB BOTTOM HOG FENCES

STIFF STAY or HINGE JOINT STYLE

Jim Brown's Barb Bottom Hog Fences will keep your hogs where you want them. A strand of Barb wire, with clean sharp barbs spaced only 3 inches apart is woven into the bottom of the fence. There are two styles, the Famous Non-Slip Ring Knot Style or the Popular Hinge Joint

Style, in various heights and weights. Stay wires are spaced only 6 inches apart. Two or three strands of barb wire above these fences makes a good economical, general purpose fence. All Jim Brown Fences are made of Copper Steel Wire with Hi-Test Pure Zinc Galvanizing.

BARB BOTTOM WIRE *DOUBLE DUTY* FENCES

**COPPER STEEL WIRE With HI-TEST
PURE ZINC GALVANIZING**

Made for the man who wishes to hold pigs, hogs, and cattle in the same pasture. Lower part has stay wires spaced 6 inches apart, upper part 12 inches apart. The bottom wire is a 2-point, 3 inch-spaced barb wire to prevent hogs from rooting under the fence.

PLAIN BOTTOM WIRE *DOUBLE DUTY* FENCES

**COPPER STEEL WIRE With HI-TEST
PURE ZINC GALVANIZING**

Here is a very popular style of fence in the hinge-joint style. Stays at bottom are spaced six inches apart where close spacing is needed. The stays at top are twelve inches apart. Thus, you have a pig-tight, cattle-high fence at a very reasonable price. Choice of two weights and two heights.

26 IN. to 48 IN. STIFF STAY FENCES

**Five Weights from Which to Choose
Stay Wires 12 Inches Apart**

Stay Wires 12 In. Apart

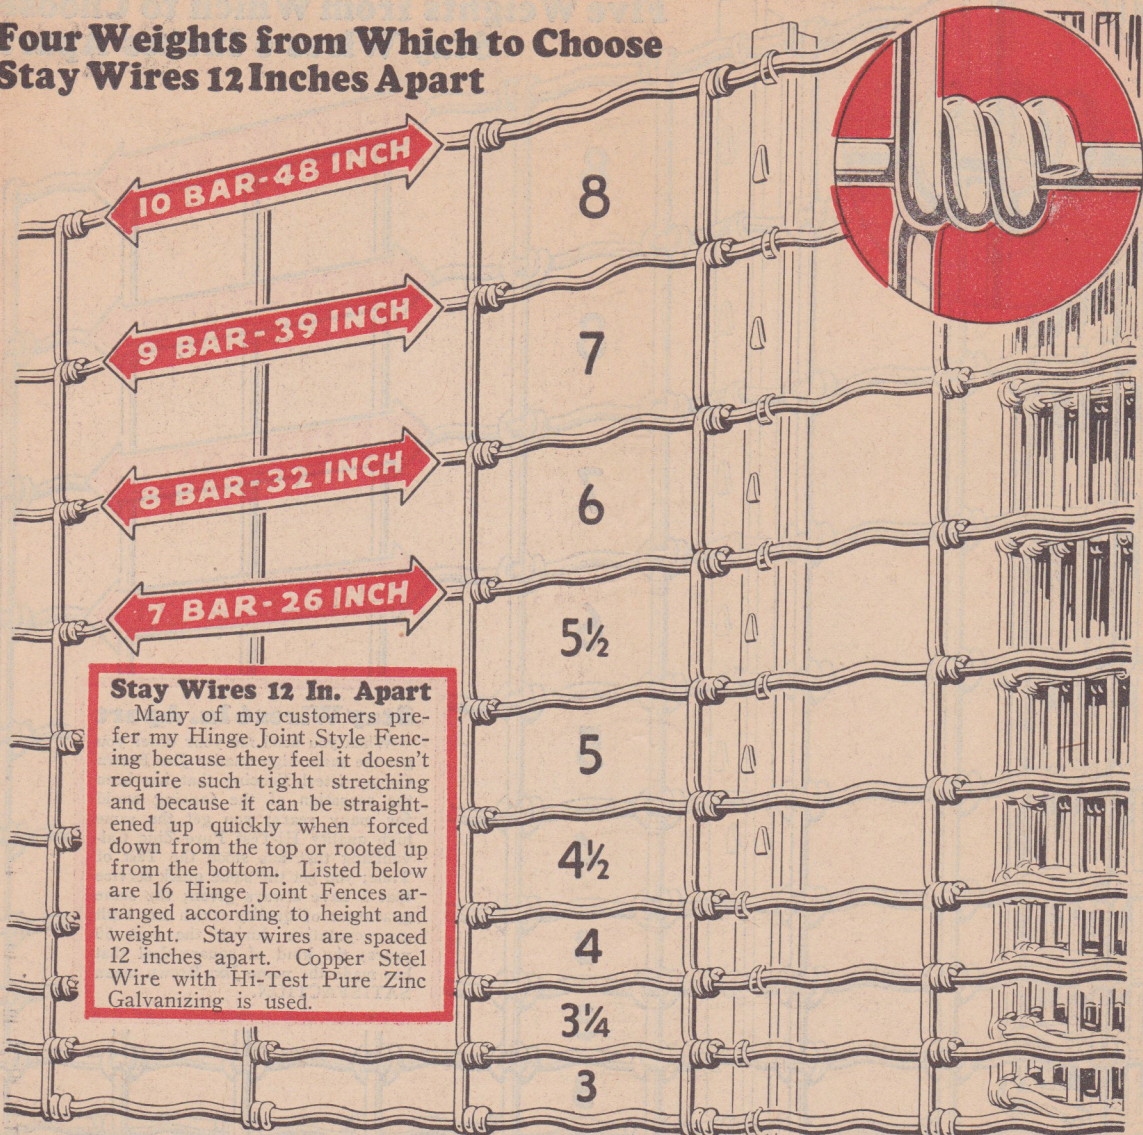

My Stiff Stay Fences with the Ring Knot have been a great favorite among my customers. They prefer this style because the stiff stays keep the fence rigid, erect and require fewer line posts. Illustrated and priced below are 20 Famous Stiff Stay Fences arranged according to heights from 26 inch with 7 bars or line wires to 48 inch with 10 bars or line wires, and with 12 inch spacing between vertical stay wires. Copper Steel Wires with Hi-Test Pure Zinc Galvanizing is used.

Jim Brown Fence is not only made of Copper Steel Wire, but this rust resisting wire is still further protected against corrosion by Hi-Test Pure Zinc Galvanizing—the heaviest, thickest coating of galvanizing it is practical to put on any fence wire. You can prove this for yourself by making the Standard Galvanizing Test, as recommended by the U. S. Dept. of Agriculture in Bulletin No. 321. I shall be glad to send you a sample of Jim Brown Hi-Test Galvanized wire with full instructions for making this Test.

COPPER STEEL WIRE with HI-TEST GALVANIZING

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

Page 31

STEEL LINE POSTS

The most complete selection of line posts I have ever seen. Six styles from which to choose. **Galvanized or Painted**

Illustrated at the left is my "U-Flanged" Post. A rugged, strong post with the added self-fastener feature. Next is my Famous Victory Post. It has a heavy Studded Backbone and greater ground bearing surface, assuring great strength. (Furnished with 6 Easy Wire Clips for attaching fence to the posts, without additional charge.) Then, there are my old reliable Angle and Tee posts furnished either punched for use with staples or the self-fastener lug type with which no staples are required.

All Jim Brown line posts are made of Carbon Rail Steel, the kind that railroads use for rails. Experience has proven this type of steel to be most satisfactory for posts. It produces a post that is stiff without being brittle, one that will withstand hard abuse and give years of satisfactory service. Posts are heavily coated with rust-resisting Red Oxide Paint or Galvanized by the Hot-Dip Process in a bath of Molten Zinc to give greater protection against rust.

FREE STAPLE CLINCHER. A Jiffy Stapling Tool is given Free with orders for Angle or "Tee" Punched Posts.

Post Driver

Just slip the end of this weighted post driver over top of post, then raise and lower driver with "pile driver action." Drives any style of Jim Brown steel drive posts.

Cat. No. 2U156
\$1.01

WIRE STAPLES

For Punched Posts. Have blunt ends. No. 10 Galvanized Wire 1 1/4 in. long. About 500 per package. **No. 1U3 43c Per Pkg.**

SPECIAL STEEL POSTS FOR ELECTRIC FENCE

Made like my regular punched angle posts except these have no anchor plates. Height 42 in. for hogs and sheep. For cattle and horses, and also for Corners and Ends, use my regular 60 in. punched posts. **Cat. No. 2U41—Steel Line Posts, 42 in. high..... Each, 15c**

Freight Prepaid on Orders of \$5.00 or More.

JUMBO STRONGEST, HEAVIEST END, CORNER and GATE STEEL POSTS

Extra Heavy 3 1/4" and 4" Seamless Steel Tubing

These big strong posts are made of heavy seamless steel tubing in two sizes, 3 1/4 inch and 4 inch outside diameter; practically impossible to bend or break them. They are about twice the size of ordinary tubular posts, and several times as strong. The top end of each post is sealed with a heavy metal cap, making it ornamental and water-tight, preventing moisture getting inside to rust and shorten the life of the post. Posts come complete with all necessary bolts and braces. End or Gate posts have 1 brace, Corner posts 2 braces. Braces are adjustable to any angle.

Painted With Red Oxide Metallic Paint

Yes, sir! These posts are protected against rust by a heavy coating of red metallic oxide paint. They will stand up for years in any weather, and resist any strain likely to be put on them.

No need to have loose, sagging fences—get My Jumbo End and Corner Posts and eliminate your fencing problems for years to come. The reason I am able to sell you these Big, Strong, Heavy Steel posts at the low prices quoted is because my Straight Line Selling Plan—from Jim Brown to You—saves you extra profits. Order 4-in. posts for heavy fences and long stretches. Freight Paid on orders of \$5.00 or more.

Here Are My Factory Prices

Be sure to order posts long enough to set 36 inches in the ground. Freight paid on orders of \$5.00 or more.

FAULTLESS PAINTED or GALVANIZED STEEL POSTS for ENDS, CORNERS GATES and LINES

Made of Redrawn Seamless Steel tubing. Heavier and stronger than any other round post of the same diameter I have ever seen. No seams or welds to open. You can rest assured they will stand any strain put upon them for they are much stronger than the average round post of equal diameter. The top of each post is finished with a heavy ornamental ball top securely wedged in place, making these posts absolutely moisture proof.

These Faultless posts can be supplied galvanized or painted. Of course, the galvanized finish will last longer because zinc is more rust-resisting than paint.

However, the painted posts have a heavy coating of green paint and will stand up for a long time without attention. An occasional coat of paint will protect them from rust indefinitely.

Whichever finish you select, galvanized or painted, you are sure to get a post that will serve your purpose most economically.

End or gate posts have one brace, corner posts have two braces each, line posts have no braces. The end and corner posts come to you complete with all necessary collars, bolts and braces. Braces are adjustable and can be set at any angle. Freight Paid On Orders of \$5.00 or More.

E-Z End, Corner and Gate POSTS

Made of heavy rail steel angles. Braced like a steel bridge. The long upright angle is extra heavy, measuring 2"x2"x 1/4" thick. The long brace measures 1 1/2"x1 1/2"x 3/16" thick. The two smaller braces measure 1 1/2"x1 1/2"x 3/16" thick. Set in concrete and you should have the strongest, stiffest end, gate or corner post that can be built.

Painted or Galvanized

Supplied either painted with Rust-Resisting Red Oxide Compound or Galvanized by the Hot Dip Process in Hi-Test Pure Zinc Spelter. End or Gate Posts have one set of braces and Corner Posts have two sets of braces.

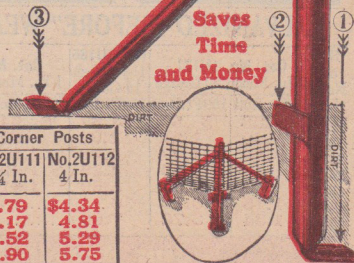

Freight Paid on Orders of \$5 or More

DIRT-SET End, Corner and Gate Posts

No Concrete Necessary

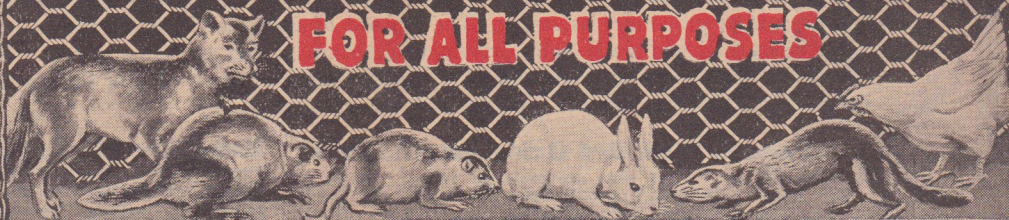

My Dirt Set End, Gate and Corner Posts really stay set in the ground without concrete even though you stretch your fence as tight as a violin string. Made of Extra Heavy 3 1/4" and 4" Seamless Steel Tubing, painted with Rust-Resisting Red Oxide Paint. Just tamp the dirt on the bent foot (1) and against the post. Drive the breast (2) and anchor (3) plates in the ground and stretch your fence. End or gate Posts have one Brace, one Breast Plate, one Brace plate. Corner Posts have two Braces, two Brace plates and two Breast plates. Braces may be set at any angle. Prepaid on Orders of \$5.00 or More.

Jim Brown

GALVANIZED NETTING FOR ALL PURPOSES

4 Gauges and 4 Mesh Sizes

There are many uses for netting. However, different jobs require different weight wires and different size mesh. For that reason, Jim Brown offers netting in four different gauges or sizes of wire, viz.: 16, 18, 19 or 20 gauge. The 16 gauge is the heaviest, 18 gauge is next, and so on to the 20 gauge which is the smallest wire. You will also find netting in ¾ inch, 1 inch, 1½ inch and 2 inch size of mesh. The heights range from 12 inches to 72 inches. All of the nettings can be supplied in rolls containing 150 running feet. Two styles of the more popular poultry nettings are also supplied in rolls containing 50 running feet as well as 150 running feet.

Galvanized Before or After

Jim Brown Netting has the Hexagon or Diamond style of mesh, GALVANIZED BEFORE WEAVING or GALVANIZED AFTER WEAVING. Netting galvanized BEFORE weaving is intended for ordinary jobs where cost is first consideration. Netting galvanized AFTER weaving is extra durable because all twists are practically soldered together in a molten zinc bath after weaving. Thus, the galvanized AFTER kind is especially recommended for permanent structures and fur-bearing animal enclosures.

High quality steel wire is used in making my nettings. The edges are smoothly bound with strong twisted selva wires. The weaving machines turn out the netting at a uniform rate and wind it into a uniformly tight roll. This makes a netting which unrolls evenly, and which can be erected easily without bulges in the fence line.

Here you will find a netting suitable for practically any purpose, such as: Poultry, Muskrat and Fox Fences, Bird and Squab Cages; Window Guards; Flower and Shrubbery Guards; Vine Trellis; Tennis Courts; Baseball Back Stops; Garden Fence, etc. Read the specifications and prices at the bottom of the page.

Style "S" Poultry Gate

There is a big demand for these Style "S" walk gates filled with Poultry Netting. The frame is made of 1 inch tubing, heavily galvanized, and welded at the joints, making it a one-piece frame. The netting is 1 inch Hex mesh, No. 18 gauge, galvanized AFTER weaving. Made only in sizes shown. Prices include fittings for wooden posts. If steel post fittings are wanted, add 50c per gate and state outside diameter of your steel gate posts.

SAVE MONEY ON FLYSCREEN

Fly Screen cloth of splendid quality wire, rust and weather resisting. Three qualities—Black Enameled is covered with a durable coating of black enamel and is 12 mesh, that is, 12 squares to the inch. The Galvanized has a tough coating of zinc and is made 14 mesh (14 squares to the inch), and 16 mesh (16 squares to the inch). Bronze screening is of pure bronze wire and is 16 mesh (16 squares to the inch)—the smallest insects and mosquitoes cannot get through.

Jim Browns

Lawn Fence and Gates

"TUDOR"

Upright wires at the top are 3 inches apart, while at the bottom the spacing is 1½ in. This "double" style of spacing is ornamental as well as practical, the close spacing at the bottom serving to keep chickens and small animals out. It also prevents children from getting their toes into the fence. The twisted cables are made up of two 13 gauge wires, spaced 6 in. apart, except the two top cables which are spaced 2½ in. apart. Made 30 in. to 60 in. high, and in two weights of picket wire, the Medium Weight, No. 11 gauge, and Heavy Weight, No. 9½ gauge. Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing. Order even rolls, otherwise figure price per foot.

"DORSET"

If you want the added protection of an open picket at the top of your lawn fence, and at the same time want a beautiful, closely spaced fence, my "Dorset" meets your requirements. The corrugated upright wires are only 1½ inches apart and are made of Standard Weight, No. 12 gauge Copper Steel Wire, protected with Hi-Test Pure Zinc Galvanizing. This is a non-climbable fence and will keep the boys out of your yard. It says "Keep Out" to all would-be trespassers. The twisted cable line wires are No. 14½ gauge, and they are spaced 6 in. apart except the two top cables which are 2½ in. apart. Made 30 inches to 60 inches. Order even rolls, otherwise figure price per foot.

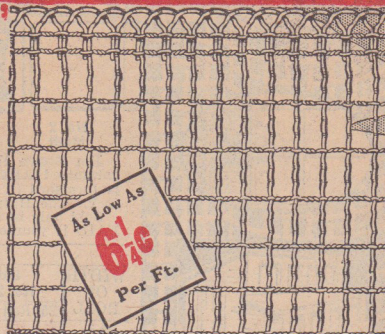

"DORSET" LAWN FENCE

Cat. No. 1U105—Standard Weight—12 Ga. Wire	Height	30 In.	36 In.	42 In.	48 In.	60 In.
Per foot		7½¢	9½¢	10½¢	11½¢	14½¢

100 ft. roll		7.60	9.10	10.10	11.10	14.10

"MARVEL"

My "Marvel" Lawn Fence is made with picket wires spaced 3 inches apart and is very popular as a back yard or division fence. It has a beautiful and ornamental wave, with corrugated wire, looped at the top as shown in the illustration. Height, 30 inches to 60 inches. "Marvel" Lawn Fence is made in two weights of picket wire, the Medium Weight, No. 11 gauge, and the Heavy Weight, No. 9½ gauge. The double cable wires are two 13 gauge wires twisted together and around the picket wires, spaced 6 in. apart, except the two top cables which are 2½ in. apart. All wires are Copper-Steel with Hi-Test Pure Zinc Galvanizing. Order even rolls, otherwise figure price per foot.

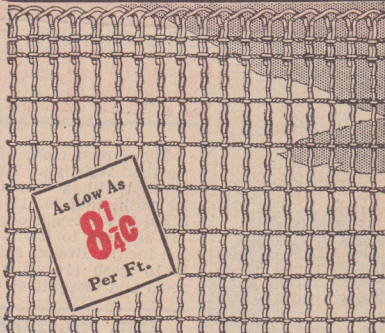

"MARVEL" LAWN FENCE—TWO WEIGHTS

"IDEAL"

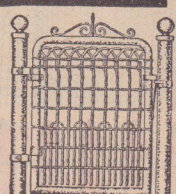

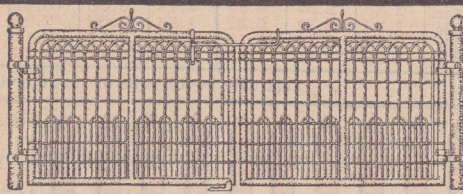

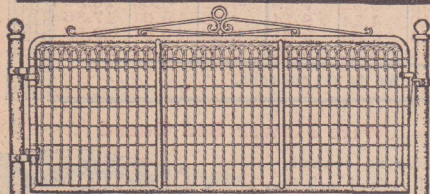

Here is a close-spaced, Heavy Weight, Lawn Fence that protects your children and pets, and beautifies your home and lawn. The picket wires are all No. 9½ gauge, the cables consist of two 13 gauge wires twisted together and spaced 6 in. apart, except the two top cables which are 2½ in. apart. The pickets are only 2½ in. apart. Made of Copper Steel Wire, with Hi-Test Pure Zinc Galvanizing. A fence like this should last for many years under normal conditions and if given a coat of aluminum paint once in 3 or 4 years, should last as long as the house it encloses. Order even rolls, otherwise figure price per foot.

"IDEAL" LAWN FENCE

Cat. No. 1U103—Heavy Weight—9½ Ga. Wire	Height	30 In.	36 In.	42 In.	48 In.	60 In.

SINGLE and DOUBLE DRIVE GATES and WALK GATES to MATCH LAWN FENCES

Jim Brown Lawn Fence Gates

I can supply Single or Double Drive Gates and Walk Gates to match any of the styles of Lawn Fencing shown above. All gate frames are made of seamless steel tubing with joints electrically welded and the entire gate is galvanized with Hi-Test Pure Zinc.

Single Drive Gates have frames made of 1½" O.D. tubing; 8 and 10 ft. widths have one upright brace and 12 and 14 ft. widths have two braces.

Double Drive Gates have frames made of 1½" O.D. tubing; 14 and 16 ft. widths have an upright brace in each section.

Walk Gates have frames made of 1" O.D. tubing.

Width of gates is distance filled between posts. Narrower gates are supplied at price of next wider size. Price of gates includes fittings for wood posts. If you are going to use steel posts add 50¢ per gate for steel post fittings and be sure to state size and shape of steel posts you will use. Gate posts are not included but must be ordered separately.

When ordering any of these Lawn Fence Gates be sure to state what style of Lawn Fence you want them to match.

COMPLETE CHAIN LINK FENCING

Price per running foot includes 2-inch mesh fabric, 3 Strands Barb Wire, extension arms, top rail, LINE POSTS (spaced approximately 10 feet apart) and all necessary fittings. OVERALL HEIGHT means distance from the bottom to the extreme top of fence, including barb wire. End, Gate, and Corner Posts are not included in prices but are priced at the bottom of this page. IF TOP RAIL is NOT wanted, deduct 12c per running foot. Gates to match are priced separately at left. Prices are for Fences with Galvanized BEFORE Weaving Fabric. If Galvanized AFTER Weaving Fabric is desired, add the difference in prices per foot between Galvanized BEFORE and Galvanized AFTER Fabrics as listed above.

Ornamental Scroll Top for Walk Gates 50c Extra

Style "R" Economy Farm Gates

Here is a gate that beats anything of its kind on the market. The frame is made of 1½ inch outside diameter steel tubing, extra heavily galvanized with pure zinc. The joints are electrically welded so the frame is one solid piece. The wire filler is my regular hinge-joint fencing with No. 9 gauge copper steel wire at top and bottom and No. 11 gauge intermediate wires. Upright wires spaced only 6 inches apart and the horizontal wires are graduated from 3 inches at the bottom to 8 inches apart at the top. All wires securely fastened to the frame. 10 ft. gate has one upright brace; 12 ft. gate has two upright braces.

My Economy Walk Gates are made of 1 inch tubing, welded at the joints and heavily galvanized. The filler is Hinge-Joint fencing made with No. 9 top and bottom wires and No. 11 intermediate wires.

16 ft.	10.84	11.67	12.49

If Barb Wire Top is wanted with above gates add \$1.25 to price.

Automatic Self-Raising Gates

My Self-Raising Gates come to you in the raised position. When in closed position gate is perfectly level. This gate raises itself automatically, about a foot and a half off the ground when the latch is released. It swings freely above snow, stones, hummocks and uneven ground. You can let small stock go from side to side while keeping the larger stock on the side you want them.

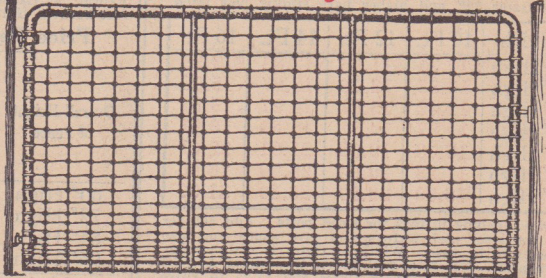

Top and bottom of frame of high carbon steel tubing, 1½ inches in diameter. Ends are 2x2x½ "U" Bars. Wire is all big, extra heavy No. 9½, galvanized. Cross wires only six inches apart.

10 and 12 ft. Gates have one upright brace; 14 and 16 ft. Gates have two upright braces.

AUTOMATIC BLUE FLAME OIL BROODER

with Patented
Heat Equalizer

No. 4U111

\$8.19
32 IN.
SIZE
Prepaid

Nothing has been left undone to give you what I consider the best blue flame oil brooder you can buy. Burns kerosene (coal oil) for fuel. Giant Super burner has long-life chrome steel tubes. Needle valve controls flow of oil to burner and is controlled by double thermostat wafer.

By-pass in valve prevents flame from going out. Heat Equalizer fits burner collar below flame level. No Hot Spots near the burner. No Cold Spots at canopy edge.

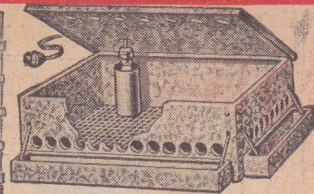

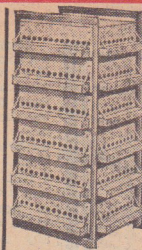

Burner, oil reservoir and oil line are in one rigid base—easy to level. Chimney is self centering thus assuring an even, smokeless blue flame—no fumes to weaken chicks. Sturdy Hexagon Shaped Canopy is made of 26 gauge galvanized steel and has ventilator in top. Sizes given are from flat side to flat side of canopy. Prepaid prices shown at right.

DeLUXE RUBBER LAWN MOWERS

I believe my De Luxe is the smoothest running and the most easily operated lawn mower available at my low prices. The heavy rubber tires give better traction, reduce vibration and lessen the shock when you strike a wall or sidewalk. This means longer life and practically noiseless operation. **BALL BEARINGS** are polished chrome steel, case hardened to withstand hard use. The Cups, Caps and Cones are made of the best tool steel, case hardened to withstand wear. This makes the machine **EASY RUNNING**. **FIVE CUTTING BLADES** are high-grade crucible tool steel, properly tempered and smoothly ground to insure even cutting. The Cutter Bar to which the lower

blade is heavily reinforced and accurately machined and fitted. Blades are self-sharpening.

PINION GEARS and PAWLS are positive in action. TWO pawls, instead of one, are used. This gives quick pick-up to the reel. **ADJUSTMENT SCREWS** are large and heavy.

WHEELS are 10 inches high, are heavily reinforced and have a deep tread which insures a non-slip drive.

HANDLE is hardwood, smoothly finished and beautifully varnished. Stands vertically when not in use. Finished in **GOLD BRONZE** with **GREEN TRIM**.

Seams are double sewed with heavy rot-proof thread. Corners are reinforced with extra patch of canvas. Rust-proof rings sewed in.

EXTRA QUALITY CANVAS

For complete protection and satisfaction on trucks, farm machinery, hay stacks, building materials, trailers, in fact anything to be protected from the weather, use Jim Brown waterproofed covers and wagon sheets. Made of strong, long fibre cotton duck, waterproofed with a treatment containing no paraffine. Seams are double sewed with heavy rot-proof thread and reinforced with large patches at corners. Double canvas around all rings. Rolled-rim rust-proof rings inserted about 5 feet apart all around. The ropes included. Weight of goods is per square yard before waterproofing in compliance with commercial standard CS-28-32 U. S. Department of Commerce. Sizes listed are cut sizes—finished dimensions will be from 4 in. to 6 in. less because of seams and hems. Tie ropes included.

First Quality BINDER CANVAS

Now, Jim Brown is prepared to give you lower prices and quicker shipments on your Binder Canvas requirements. Send me your Binder Canvas orders and I will not only make immediate shipment but I will send you a combination of fine tested materials and thorough workmanship—a canvas that will give you real performance on your Binder and do the work required of it.

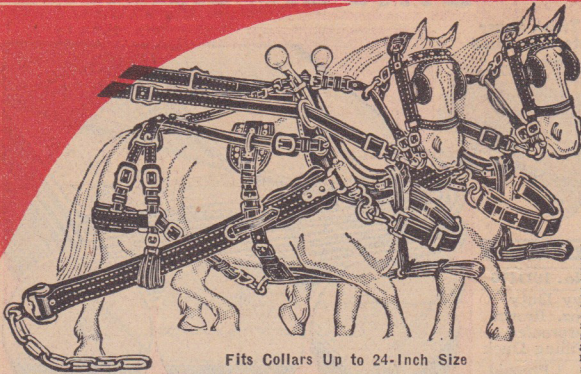

Jim Brown Binder Canvases are made from first quality closely woven haverster duck with reverse construction. Have four-thread warp yarns running lengthwise in the direction of the pull for longer service. Smoothly finished oak slats are securely riveted and stapled and work freely. Non-slip Buckles. Non-rust rivets. Guaranteed full weight and size.

Be sure to give make of Binder and the number and size of your old Canvas. The numbers shown in the table below should correspond with those on your old Canvas. If you cannot find numbers and sizes on old canvas, measure around rollers for length and distance between canvas guides for width. State Catalog and Canvas numbers and whether for upper or lower elevator or platform. Prices are Prepaid.

STEEL PIPE BLACK OR GALVANIZED

Save Money on Those New Piping Jobs

This is brand new pipe and meets all standard specifications for weight, thickness, strength, threading. I do not sell "seconds," "rejects" or so-called "scratch" pipe. Every length is perfect. Actually tests 25% better than standard steel pipe.

Black pipe is just as it comes from the mill, with no coating, and is generally used for irrigation, oil, gas, steam, hot water systems, air lines, etc. Galvanized pipe is coated inside and outside with a heavy layer of zinc spelter put on by the hot-dip process which protects it from rust. Galvanized pipe is recommended for drinking water, supply and waste pipes, and wherever it is necessary for pipe to resist rust inside and outside. Uniform 20 ft. lengths. If shorter lengths are wanted, no couplings are furnished, unless ordered extra, and you must add extra for threads at each end.

How To Order Pipe

In figuring sizes please remember that pipe is measured by INSIDE DIAMETER. (3/4 inch pipe is almost 1 inch OUTSIDE DIAMETER.) Prices quoted are PER LINEAL FOOT in 20 foot lengths. Each length includes a thread on each end and one straight end coupling. If you specify any other lengths ALL THREADS WILL COST EXTRA as shown at right and NO COUPLINGS WILL BE SUPPLIED unless ordered extra. Couplings and other fittings shown below.

Inside Diam.	BLACK		GALVANIZED		Extra Threads Per End

Freight paid on orders of \$5.00 or more.

GALVANIZED PIPE FITTINGS

All fittings are heavy GALVANIZED. Sizes shown are INSIDE DIAMETER OF PIPE TO WHICH THEY CONNECT. Be sure to order correct size. Fittings are sold only with orders for pipe and are shipped prepaid with your pipe, at prices quoted.

Be sure to state length wanted, also pipe size. Made of Galvanized Pipe.

Jim Brown's Galvanized Heavy Steel Tanks

Made from Heavy 20 Ga. Steel

When you buy from Jim Brown, you get a heavy, rust-resisting steel tank that will give you long service without leaking. Furnished in both corrugated and smooth styles and in a wide variety of sizes. Supplied with necessary heavy top and side braces.

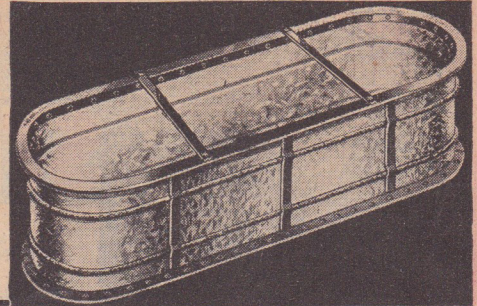

Corrugated Tanks

Corrugated tanks with vertical corrugations all around add strength and stiffness and allow for expansion of freezing water. Sides are folded at top making a flange of three thicknesses of steel while the bottom and sides are folded together to form a flange of four thicknesses which is packed with a special water-proofed packing, coated with a water-proofed seal and closely riveted, making a water-tight joint and a tank that does not leak. Heavy 20 gauge.

Smooth Tanks

Smooth tanks have angle-iron tops properly braced according to size of tank. All joints or seams are made with a rust-proof lock seam, sweat soldered on the inside, which makes a smooth clean joint. Two 7/8" by No. 10 bands are closely riveted to bottom flange. This joint is sweat soldered on the inside, insuring the tank against leakage. Both round and round end stock tanks have a bead turned six inches from top and bottom, a feature not usually found on most smooth tanks.

FREIGHT PREPAID ON ORDERS OF \$5.00 OR MORE

SAVE ON STEEL WHEELS

My deep grooved, double strength, double life Steel Wheels have tires with extra thick edges and new deep grooves which protect the spoke-heads from actual road contact. Heavy staggered spokes with reinforcing bell shape ends. Heavy cast hubs have extra large bearing surface.

READY MADE WHEELS

Ready Made Steel Wheels have cast iron hubs to fit 3 3/4"x10" V.D. cast skains measuring 3 3/8" diameter at large end, 2 1/4" diameter at point, 10 1/2" in length, collar 4 1/2", nut 3 1/4". Furnished without skains to fit skains with same measurements as given above. If your skain measurements are different from those given above order my Made-to-Measure Wheels listed below.

Single Wheels With 4x3/8 In. Tires To Fit Skain Size Given Above

7U305	34 in.	5.45
7U306	36 in.	5.87

Directions for Ordering Made-to-Measure Steel Wheels

We must have exact measurements of your old skains at points indicated in diagram. Use callipers or cut cardboard to fit each skain dimension. Always take measurements from skains and not from wheel hub, measuring crosswise and not from top to bottom.

Measure (1) Length of spindle; (2) diameter of collar next to spindle; (3) largest diameter of spindle; (4) smallest diameter of spindle; (5) largest diameter of nut. Allow 5 to 10 days for shipment.

Made-to-Measure Steel Wheels

Jim Brown Made-to-Measure steel wheels are manufactured in such a manner that the spoke end is actually fused into the hub making loose spokes in the hub absolutely impossible as the hub and spokes at this point are really one piece which also positively eliminates any chance of grease leaks around the spokes.

When ordering Made-to-Measure Wheels it is absolutely necessary that you send in your skain measurements as indicated under "Directions for Ordering" shown at left.

Jim Brown Push-up Type EXTENSION LADDERS

Avoid ladder accidents due to defective material and faulty construction by sending me your order for one of my safety, TRUSS RUNG, EXTENSION LADDERS. Every Jim Brown SAFETY EXTENSION LADDER is made under specifications which have been approved by the AMERICAN SOCIETY OF SAFETY Engineers and the U. S. Dept. of Labor.

STEEL TRUSS RUNGS

Rails are made from carefully selected Western straight grained Fir, measuring 1 1/16 x 2 3/4 inches when finished. The rungs are from carefully selected, thoroughly seasoned second growth hickory and a 3/4 inch steel Truss Rod under the top, middle and bottom dowl of each section firmly ties the side rails together adding greatly to the sturdiness of Jim Brown Ladders. The ends of the rungs are creosote treated preventing them from shrinking or rotting out.

Cadmium Plated Metal Parts

Jim Brown Extension Ladders are equipped with Cadmium Plated metal parts insuring longer life. Have automatic hooks and wide flared bottoms. Order Jim Brown Extension Ladders at my Bargain Freight Prepaid Prices shown below.

EXTRA SAFETY

the heavy washer and nut that securely holds the rails together adds to their strength and rigidity.

Jim Brown's 4-PLY STERLING Guaranteed for 12 Months!

Cost As Low As 37c Per Month

You cannot be a Safe Driver without Safe Tires. Jim Brown Sterling Tires are far superior in quality to most tires in this price range and equal in quality to many tires selling at higher prices. Figure the cost per month on my 4-ply Sterling Tires and see how much less per month they cost you.

Rugged, massive and well-built. Made from dependable selected materials. Deep cut, non-skid tread design assures the maximum of safe mileage. Tough, cut-resisting, slow wearing tread rubber compounded for long service. Strong cotton cable cords with plenty of friction rubber between the plies. Beads of ample strength with all plies tied into the beads in the most approved manner. Sterling Tires are built to win your approval in price and service.

MY GUARANTEE—Jim Brown 4-ply Sterling Tires are unconditionally guaranteed against defects in materials and workmanship. They are also guaranteed to give you 12 months' average service. I will replace any tire which does not give you this service with a new tire, charging you only for the length of service which you received. Tires sent in for adjustment must be prepaid.

8-PLY to 12-PLY HEAVY DUTY TRUCK and BUS TIRES

Unusual Braking Traction for Safety

Jim Brown Truck and Bus Tires carry heavy loads with Speed and Safety. They get you where you want to go Promptly and Economically. The Heavy, Massive, Wide, Non-Skid Tread is designed for powerful, effective traction and protection against skidding. New heavy sidewall construction and extra heavy Gum Cushion under sidewall further protect against punctures and blow-outs and provide exceptionally easy riding. Cord plies are inserted in heat resisting cushion that welds the tread securely to the carcass and eliminates tread separation.

My Truck and Bus Tires guaranteed against defects in materials and workmanship. "Super Grade Tires" guaranteed to give 6 months' average service. Standard Grade Tires built of high quality materials heavily constructed for good service. Guaranteed to give 4 months' average service. Transportation charges not paid on tires sent in for adjustment.

**5 Automatic
Wickless Burners
Double Cooking Space
Built-On Oven, Enclosed Body**

This modern Kerosene Oil Range has all the outstanding features of the higher priced ranges including a fully enclosed body, concealed metal oil tank (1 gal. cap.), high shelf, back guard and Double-Space cooking top. This cooking top has double grates which give double cooking space for each burner. The front holes receive the concentrated heat while the back holes provide an excellent place for slow cooking or simmering. Oven door and oven side are white porcelain enameled. Burner drums are black porcelain enameled. Balance of range is finished in black and white baked-on enamel as shown. Handles are chrome and bakelite. Has leg levelers and spirit level. MEASUREMENTS: Overall—47 3/4" long x 22" wide x 51" high; Cooking Top—26 1/2" long and 21 1/2" wide x 32 1/2" high; Oven—16" wide x 20" deep x 14" high.

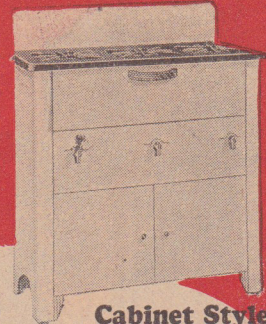

No. 6U708—Automatic Wickless Range Prepaid **\$24.49**

**5 Full Size
Automatic
Wickless Burners
with Built-On Oven**

Here is an efficient kerosene oil range at a money-saving price. It is very economical to operate because the large, automatic wickless burners produce a powerful, blue-flame directly under the cooking vessels. Only high heat-resisting silicon steel burner tubes are used. Cooking top is stamped from one piece of steel and has heavy cast iron grates. Oven has aluminized steel linings and an accurate heat indicator. Glass Oil Bottle holds 1 gallon. Leg Levers and Spirit Level on pipe line enable you to set the range properly. Oven door and oven side are white porcelain enameled. Burner drums are black porcelain enameled. Balance of range is finished in black and white baked-on enamel as shown. Burner handles are black enameled steel; oven door handle is chrome and bakelite, bar-type. MEASUREMENTS: Overall—51 1/2" long x 18" wide x 48" high; Cooking Top—26 3/4" long x 17" wide x 33" high; Oven—14" wide x 16" deep x 12" high.

No. 6U724—Economy Oil Range Prepaid **\$17.59**

**Cabinet Style
with 3 Automatic
Wickless Burners**

Beautiful cabinet style Kerosene Oil Stove, finished in WHITE BAKED-ON ENAMEL.

The three large automatic wickless burners contain rust-resisting silicon steel tubes. The grates are cast iron and the 3 1/2 qt. concealed fuel tank can be filled without moving the stove. Has spacious utensil compartment with double doors. Patented levelers attached to the bottom of the legs permit the stove to stand level and firm. Spirit level enables you to tell when the pipe line is level, thus permitting a free flow of oil at all times. The 5" Splasher keeps your wall from becoming soiled. Measurements: Overall 34"x17"x38" high; Top 34"x17"x33" high; Utensil Space 27 1/2"x9 1/2"x13" high.

**Duplex or
Dock Ash Grates**

Copper steel body is double constructed, electrically welded and lined with heat-resisting asbestos to save fuel. The Cooking Top is heavy cast iron, has six 8-inch lids, and is finished in jet black.

The Oven is roomy and is securely braced on bottom with cast-iron channel bars to prevent warping. Firebox is fitted with one-piece fireback and removable linings for burning wood. Firebox takes 20-inch wood when end linings are removed. Duplex Grates for burning soft coal and wood are regular equipment. Dock Ash Grates for hard coal can be supplied instead of duplex grates, at no extra cost, IF SPECIFIED WITH ORDER. Galvanized Reservoir Tank holds 20 quarts. A 1/2-inch Hot Water Coil can be supplied for \$3.00 extra, IF SPECIFIED WITH ORDER.

\$21.45

Freight Paid

Top with end shelf: 28 1/2" x 18 1/4", with reservoir 37" x 18 1/4", height 27 1/2". Height with high shelf 44 3/4", with warming closet 55". Oven 13 1/2" x 16 1/2" x 9". Firebox for coal 13 1/2" x 7" x 6".

The Rio is neat and trim in appearance, exceptionally well built and an excellent cooker and baker. It operates economically, and at these prices you will save

money. The Body, oven and base strips are made of steel. The top oven door frame, fire and ash door frame and doors, draft slide and legs are cast iron. Body is black with white porcelain panels as illustrated. Polished cooking top contains four 7-inch lids and push-pull type damper for regulating oven heat.

Cast iron firebox has dumping grates for wood or soft coal. Takes 17" wood with end liners removed. Has 6" pipe collar. Galvanized reservoir holds 18 quarts.

**My 50th Anniversary Special
BUY NOW AND SAVE AT MY
NEW LOW PRICE!**

For many years I have been giving special values to my customers at this season of the year. In keeping with this custom I am offering my super value overall at a real bargain price. I have made this overall of a strong, tough 8 oz. sanforized shrunk white back indigo blue denim—made to keep its size and shape after repeated washing.

The full cut roomy comfort cannot be beat. The triple stitched seams are guaranteed not to rip. A new pair if they do. Bar tacked and reinforced at every strain point to give added strength. The heavy drill pockets are deep and roomy and the hip pockets are double at the bottom. The handy rule or plier pocket and wide hammer loop are strongly reinforced. Combination watch and pencil pocket on bib. Rustproof buttons and buckles.

Jacket to Match

The full cut roomy Jacket to match has 4 large pockets. The lower pockets are double thick at bottom for added wear. A combination watch and pencil breast pocket. Triple stitched seams and bar tacks at all points of strain for added wear. Rustproof buttons.

Overall: Even Waist sizes 30 to 52 inches. Even inseam sizes 30 to 36 inches. State waist and inseam measure.

Jackets: Even chest sizes 36 to 54 inches. State chest size.

YOU'D NEVER GUESS I PAID ONLY **67^c** EACH FOR THESE HEAVY CAMBRAY and COVERT *Sanforized* SHIRTS

YES SIR! That's *Jim Browns Price!* NOW READ ABOUT THE QUALITY!

These shirts are SANFORIZED so they won't shrink out of size no matter how many times they are washed! If you could grasp one of these blue or gray chambray shirts and actually feel the material, you would find that it is heavy weight, closely-woven fabric that is made to wear like iron and stand up under repeated washings, wringings and ironings. The weight and toughness of this chambray is equal to some other shirts which sell for as much as \$1.00.

Now let's look at the Covert shirt. It is the best looking and longest wearing Covert you ever saw! The material is a heavy weight, closely woven fabric that will resist hard wear longer, I believe, than any other shirt you ever wore!

In the construction of these shirts there is no skimping on the sizes. They are cut big and roomy across the shoulders, across the chest, in the sleeves and armholes, and in the length. The double-stitched collar is made with two thicknesses of material, with an inner lining which keeps it in shape. Look at the double shoulder yokes which are triple stitched, and see how the sleeves are set into the shoulder with triple stitches. The sleeve opening at the bottom has two buttons, and the continuous one-piece facing prevents the

shirt from ripping at the sleeve opening. Note that even the cuffs are double stitched.

Two big roomy bellows pockets and pencil opening, with button through double-thickness flaps. The pockets are double stitched, and bar tacked at the points of strain.

There are seven "laundry-proof" buttons down the front of these shirts instead of 5 or 6. The center pleat is double stitched and fully 1½ in. wide. The seams down the sides are triple stitched.

If I were to put one of these shirts into your hands and ask you what you thought it was worth I am sure you would say "at least 89c and maybe \$1.00."

I want you to make Jim Brown headquarters for your work clothes and I have put everything I possibly could into these shirts to deserve your confidence! ORDER NOW and SAVE MONEY! Be Sure to Give Size and Color. Made in Half Sizes from 14½ to 17. Order your correct size because these shirts are SANFORIZED and will not shrink.

What a Bargain!

I'VE NEVER BEFORE SEEN SUCH FINE CHAMBRAY SHIRTS AT THIS PRICE

48^c Each
Postpaid

In order to offer you this amazing value we spent months examining and testing the products of various manufacturers throughout the country. Even after we found exactly the shirts we wanted I decided that the only way we could still make you a tremendous bargain offer would be for us to accept a very small profit on each shirt. This we are doing, and when you see these shirts you will realize what I have accomplished.

The material used in these shirts is a medium heavy quality but considerably heavier than you would expect at this price even if you are an expert bargain hunter. The workmanship on these shirts is first-class. For example: All of the main seams are triple stitched, the collar is interlined so that it will always look well. There is a double shoulder yoke, wide front panel with six laundry proof buttons, two large button-through pockets and pencil opening, with heavy bar tacking at the points of strain. The sleeves have continuous facings to prevent ripping and the shirts are cut full and roomy throughout. There is absolutely no skimping on the amount of material used in each size. I know you will be amazed at the value offered at this price. Your choice of Gray or Blue Chambray, or Gray Covert. Supplied in half sizes from 14½ to 17. Be sure to specify size and color.

Medium Weight Blue Chambray

It is cut full and roomy across the shoulders, in the armholes, in the length, across the chest. The material is a medium weight Blue Chambray. The main seams are triple stitched and rip proof. The two large button-through pockets and pencil pocket are bar tacked so they won't rip off. There is a double shoulder yoke, double collar, double cuffs and a continuous one-piece sleeve facing. This is a five-button shirt; wide, double front pleat. Half sizes 14½ to 17. Be sure to state size. **POSTPAID.**

BARGAINS for the LADIES!

*A Silk Stocking Bargain
You will Long Remember*

I guess I've been pretty slow about offering merchandise to the women folks but here's proof that I'm making up for lost time!

Just think of getting these gorgeous, durable 4-thread ringless chiffon stockings for only 79c a pair! My shopping experts tell me they are worth up to a dollar a pair!

The four-thread weight is sheer enough for evening wear, and strong enough for every-day wear. Economy construction—silk over cotton sole and toe. Soles, heels and tops strongly reinforced.

All the wanted summer shades, ranging from Sunnisand to the darker shade of Rose Ash. Sunnisand is a dark shade of buff; Coral Shell is a rose tinted buff; Powder Gold is a sun-tan shade; Rose Ash is a deep rose-tinted sun tan. Sizes 8½ to 10½. Please be sure to give size.

Jim Brown's

FIRST QUALITY 4^{or} 6 Tires

FIRST LINE PLY

SIZE
4.40-21

\$5.42
4-Ply
Prepaid

FIGURE THE COST Per Month

Regardless of claims or prices, there is only one way to be sure of what your tires actually cost you per month, and that is to get a guarantee from a reliable company for a definite number of months use out of the tires you buy. When you buy your tires from Jim Brown, you know in advance the maximum cost per month because I give you a guarantee of a definite number of months service.

MY GUARANTEE—Jim Brown 4-Ply and 6-Ply First Line Tires are unconditionally guaranteed against defects in materials and workmanship. They are also guaranteed to give you 18 months and 24 months of average service respectively. I will replace any tire which fails to give you this service with a new tire, charging you only for the length of service which you receive. Tires sent in for adjustment must be prepaid.

With this guarantee and with a Jim Brown reputation backing it up, why pay more than my prices for tires.

6-Ply First Line Tires Guaranteed For 24 Months

They stand the "gaff" of long drives and the strain of high speed with the added protection of easy steering and safety from skidding. They are guaranteed to give you 24 months of average service.

4-Ply First Line Tires Guaranteed For 18 Months

A remarkable tire with a definite 18 months' guarantee at an amazingly low price. For genuine service, assured mileage and good looks there is nothing better at my low price.
